

The sum (total) of a group of numbers added together then divided by the number of addends in that group. If your set of numbers is **3, 9, 6, 2** just add them together first:

**3 + 9 + 6 + 2 = 20**

Now divide the 4 because that is how many numbers were added together: **20 ÷ 4 = 5**

Find the average of each set of numbers.

<i>set</i>	Average
, , , = _____ ÷ 4 = _____	

, , , , = _____ ÷ 5 = _____	
-----------------------------	--

	Average
, , = _____ ÷ 3 = _____	

, , , = _____ ÷ 4 = _____	
---------------------------	--

	Average
, , = _____ ÷ 3 = _____	

, , , , = _____ ÷ 5 = _____	
-----------------------------	--

	Average
, , = _____ ÷ 3 = _____	

, , = _____ ÷ 3 = _____	
-------------------------	--

<i>set</i>	Average
