

Metric: Liquid Volume

The *Metric System* is a base 10 system where you multiply or divide by zeros to convert from one unit to another.

$$1000 \text{ mL(milliliters)} = 1 \text{ L(liter)} \quad 1000 \text{ L (liters)} = 1 \text{ kL(kiloliter)}$$

$$\text{mL} = \text{milliliter} \quad \text{L} = \text{liter} \quad \text{kL} = \text{kiloliter}$$

$$\text{mL} = \underline{\hspace{2cm}} \text{ L}$$

$$\text{mL} = \underline{\hspace{2cm}} \text{ kL}$$

$$\text{kL} = \underline{\hspace{2cm}} \text{ L}$$

$$\text{L} = \underline{\hspace{2cm}} \text{ kL}$$

$$\text{kL} = \underline{\hspace{2cm}} \text{ L}$$

$$\text{mL} = \underline{\hspace{2cm}} \text{ L}$$

$$\text{kL} = \underline{\hspace{2cm}} \text{ L}$$

$$\text{mL} = \underline{\hspace{2cm}} \text{ L}$$

$$\text{mL} = \underline{\hspace{2cm}} \text{ L}$$

$$\text{mL} = \underline{\hspace{2cm}} \text{ kL}$$

$$\text{kL} = \underline{\hspace{2cm}} \text{ mL}$$

$$\text{mL} = \underline{\hspace{2cm}} \text{ kL}$$

$$\text{L} = \underline{\hspace{2cm}} \text{ mL}$$

$$\text{kL} = \underline{\hspace{2cm}} \text{ mL}$$

$$\text{L} = \underline{\hspace{2cm}} \text{ kL}$$

$$\text{kL} = \underline{\hspace{2cm}} \text{ L}$$

$$\text{L} = \underline{\hspace{2cm}} \text{ mL}$$

$$\text{kL} = \underline{\hspace{2cm}} \text{ mL}$$
