

Standard Units: Liquid Volume

The *Standard Unit* system of measuring is mostly used in the United States. Most other parts of the world use the Metric System.

$$8 \text{ oz} = 1 \text{ c (cup)} \quad 2 \text{ c} = 1 \text{ pt (pint)} \quad 2 \text{ pt} = 1 \text{ qt (quart)} \quad 4 \text{ qt} = 1 \text{ gal (gallon)}$$

$$\text{gal} = \text{gallon} \quad \text{qt} = \text{quart} \quad \text{pt} = \text{pint} \quad \text{c} = \text{cup} \quad \text{oz} = \text{ounce}$$

$$\text{qt} = \underline{\hspace{2cm}} \text{ oz}$$

$$\text{oz} = \underline{\hspace{2cm}} \text{ c}$$

$$\text{c} = \underline{\hspace{2cm}} \text{ pt}$$

$$\text{gal} = \underline{\hspace{2cm}} \text{ pt}$$

$$\text{pt} = \underline{\hspace{2cm}} \text{ c}$$

$$\text{qt} = \underline{\hspace{2cm}} \text{ pt}$$

$$\text{oz} = \underline{\hspace{2cm}} \text{ c}$$

$$\text{gal} = \underline{\hspace{2cm}} \text{ qt}$$

$$\text{c} = \underline{\hspace{2cm}} \text{ oz}$$

$$\text{gal} = \underline{\hspace{2cm}} \text{ oz}$$

$$\text{qt} = \underline{\hspace{2cm}} \text{ c}$$

$$\text{gal} = \underline{\hspace{2cm}} \text{ c}$$

$$\text{pt} = \underline{\hspace{2cm}} \text{ c}$$

$$\text{gal} = \underline{\hspace{2cm}} \text{ qt}$$

$$\text{qt} = \underline{\hspace{2cm}} \text{ c}$$

$$\text{oz} = \underline{\hspace{2cm}} \text{ pt}$$

$$\text{qt} = \underline{\hspace{2cm}} \text{ oz}$$

$$\text{gal} = \underline{\hspace{2cm}} \text{ oz}$$
