

Standard Units: Weight

The *Standard Unit* system of measuring is mostly used in the United States. Most other parts of the world use the Metric System.

$$16 \text{ oz (ounces)} = 1 \text{ lb (pounds)} \quad 2000 \text{ lbs} = 1 \text{ t (ton)}$$

$$\text{oz} = \text{ounce} \quad \text{lb} = \text{pound} \quad \text{t} = \text{ton}$$

$$\text{lbs} = \underline{\hspace{2cm}} \text{ oz}$$

$$\text{oz} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{tons} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{lbs} = \underline{\hspace{2cm}} \text{ t}$$

$$\text{t} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{oz} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{t} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{oz} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{lbs} = \underline{\hspace{2cm}} \text{ tons}$$

$$\text{tons} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{lbs} = \underline{\hspace{2cm}} \text{ oz}$$

$$\text{tons} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{oz} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{oz} = \underline{\hspace{2cm}} \text{ tons}$$

$$\text{oz} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{oz} = \underline{\hspace{2cm}} \text{ lbs}$$

$$\text{lbs} = \underline{\hspace{2cm}} \text{ oz}$$

$$\text{tons} = \underline{\hspace{2cm}} \text{ lbs}$$
