

To find the decimal equivalent of a fraction divide the denominator into the numerator.

Problem Area: The important thing to remember is to place the decimal point in the quotient (answer) before you start to divide. This will eliminate any problems on where to place the decimal after an answer is found.

$1/20 = .05$

$1/3 = .333$

$1/4 = .25$

$7/14 =$

$9/27 =$

$11/22 =$

$2/5 =$

$5/12 =$

$6/36 =$

$7/9 =$

$25/100 =$

$10/13 =$

$3/4 =$

$1/5 =$

$9/15 =$

$4/5 =$

$19/20 =$

$24/36 =$
