

# Area - Triangle/Circle Triyang/Sèk

**Triangle:** Yon polygon ak 3 ang ak 3 kote. areas = 1/2 base x height or base x height ÷ 2 (menm bagay)

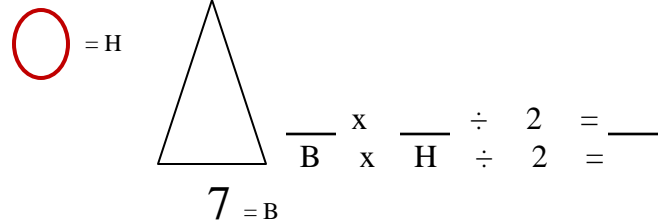

**Circle:** Yon objè won ki gen menm radius ak sikonferans nan tout direksyon.

circumference =  $2\pi r$  or  $\pi d$       area =  $\pi r^2$   
 $\pi = 3.14$      $r = \text{radius}$        $d = \text{diameter}$        $c = \text{circumference}$

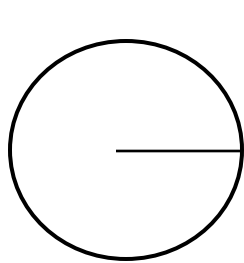

$5 = H$        $\frac{\quad}{B} \times \frac{\quad}{H} \div 2 = \underline{\quad}$

$\bigcirc = B$

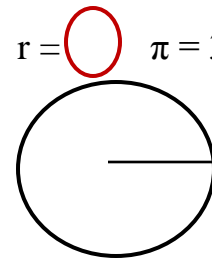

$\bigcirc = H$        $\frac{\quad}{B} \times \frac{\quad}{H} \div 2 = \underline{\quad}$

$7 = B$

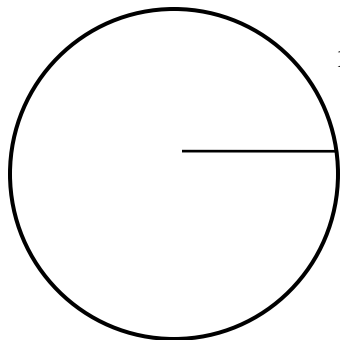

$r = \bigcirc$      $\pi = 3.14$

$\frac{\quad}{\pi} \times \frac{\quad}{r^2} = \underline{\quad}$

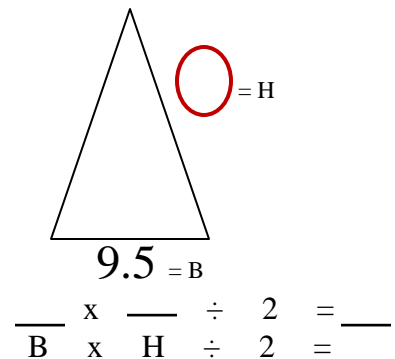

$r = \bigcirc$      $\pi = 3.14$

$\frac{\quad}{\pi} \times \frac{\quad}{r^2} = \underline{\quad}$

$r = 7. \bigcirc$      $\pi = 3.14$

$\frac{\quad}{\pi} \times \frac{\quad}{r^2} = \underline{\quad}$

$\bigcirc = H$

$9.5 = B$

$\frac{\quad}{B} \times \frac{\quad}{H} \div 2 = \underline{\quad}$
