

The *Standard Unit* of measuring is mostly used in the United States. Most other parts of the world use the Metric System.

$$16 \text{ oz} = 1 \text{ lbs (pound)} \quad 2000 \text{ lbs} = 1 \text{ t (ton)}$$

$$\text{oz} = \text{ounce} \quad \text{lbs} = \text{pound} \quad \text{t} = \text{ton}$$

$$\underline{\quad} \text{ lbs} = \underline{\quad\quad\quad} \text{ oz}$$

$$\underline{\quad} 40 \text{ oz} = \underline{\quad\quad\quad} \text{ lbs}$$

$$\underline{\quad} \text{ tons} = \underline{\quad\quad\quad} \text{ lbs}$$

$$\underline{\quad\quad\quad} \text{ lbs} = \underline{\quad\quad\quad} \text{ t}$$

$$\underline{\quad} \text{ tons} = \underline{\quad\quad\quad} \text{ lbs}$$

$$\underline{\quad} \text{ oz} = \underline{\quad\quad\quad} \text{ lbs}$$

$$\underline{\quad\quad\quad} \text{ t} = \underline{\quad\quad\quad} \text{ lbs}$$

$$\underline{\quad\quad\quad} \text{ oz} = \underline{\quad\quad\quad} \text{ lbs}$$

$$\underline{\quad\quad\quad} \text{ lbs} = \underline{\quad\quad\quad} \text{ tons}$$

$$6. \underline{\quad} \text{ tons} = \underline{\quad\quad\quad} \text{ lbs}$$

$$6 \underline{\quad} \text{ lbs} = \underline{\quad\quad\quad} \text{ oz}$$

$$\underline{\quad} .2 \text{ tons} = \underline{\quad\quad\quad} \text{ lbs}$$

$$14. \underline{\quad} \text{ oz} = \underline{\quad\quad\quad} \text{ lbs}$$

$$13. \underline{\quad} \text{ oz} = \underline{\quad\quad\quad} \text{ tons}$$

$$\underline{\quad} .8 \text{ oz} = \underline{\quad\quad\quad} \text{ tons}$$

$$\underline{\quad} \text{ oz} = \underline{\quad\quad\quad} \text{ t}$$

$$\underline{\quad} \text{ lbs} = \underline{\quad\quad\quad} \text{ oz}$$

$$\underline{\quad} \text{ tons} = \underline{\quad\quad\quad} \text{ lbs}$$
