

The *Standard Unit* of measuring is mostly used in the United States. Most other parts of the world use the Metric System.

$$\begin{array}{l} 8 \text{ oz} = 1 \text{ c (cup)} \\ 2 \text{ pt} = 1 \text{ qt (quart)} \end{array} \quad \begin{array}{l} 2 \text{ c} = 1 \text{ pt (pint)} \\ 4 \text{ qt} = 1 \text{ gal (gallon)} \end{array}$$

gal = gallon    qt = quart    pt = pint    c = cup    oz = ounce

$$14 \text{ qt} = \underline{\hspace{2cm}} \text{ oz} \qquad 18 \text{ oz} = \underline{\hspace{2cm}} \text{ pt} \qquad 22 \text{ c} = \underline{\hspace{2cm}} \text{ pt}$$

$$1 \text{ gal} = \underline{\hspace{2cm}} \text{ pt} \qquad 3 \text{ pt} = \underline{\hspace{2cm}} \text{ c} \qquad 8 \text{ qt} = \underline{\hspace{2cm}} \text{ pt}$$

$$33 \text{ oz} = \underline{\hspace{2cm}} \text{ c} \qquad 3 \text{ gal} = \underline{\hspace{2cm}} \text{ qt} \qquad 18 \text{ c} = \underline{\hspace{2cm}} \text{ oz}$$

$$4 \text{ gal} = \underline{\hspace{2cm}} \text{ oz} \qquad 6 \text{ qt} = \underline{\hspace{2cm}} \text{ c} \qquad 2 \text{ gal} = \underline{\hspace{2cm}} \text{ c}$$

$$14.5 \text{ pt} = \underline{\hspace{2cm}} \text{ c} \qquad 13.5 \text{ gal} = \underline{\hspace{2cm}} \text{ qt} \qquad 2.25 \text{ qt} = \underline{\hspace{2cm}} \text{ c}$$

$$14 \text{ oz} = \underline{\hspace{2cm}} \text{ pt} \qquad 6 \text{ qt} = \underline{\hspace{2cm}} \text{ pt} \qquad 10 \text{ gal} = \underline{\hspace{2cm}} \text{ oz}$$
