

The *Standard Unit* of measuring is mostly used in the United States. Most other parts of the world use the Metric System.

$$16 \text{ oz} = 1 \text{ lbs (pound)} \quad 2000 \text{ lbs} = 1 \text{ t (ton)}$$

$$\text{oz} = \text{ounce} \quad \text{lbs} = \text{pound} \quad \text{t} = \text{ton}$$

$14 \text{ lbs} = \underline{\hspace{2cm}} \text{ oz}$

$140 \text{ oz} = \underline{\hspace{2cm}} \text{ lbs}$

$4 \text{ tons} = \underline{\hspace{2cm}} \text{ lbs}$

$750 \text{ lbs} = \underline{\hspace{2cm}} \text{ t}$

$.75 \text{ tons} = \underline{\hspace{2cm}} \text{ lbs}$

$8 \text{ oz} = \underline{\hspace{2cm}} \text{ lbs}$

$1000 \text{ t} = \underline{\hspace{2cm}} \text{ lbs}$

$1000 \text{ oz} = \underline{\hspace{2cm}} \text{ lbs}$

$1000 \text{ lbs} = \underline{\hspace{2cm}} \text{ tons}$

$6.5 \text{ tons} = \underline{\hspace{2cm}} \text{ lbs}$

$650 \text{ lbs} = \underline{\hspace{2cm}} \text{ oz}$

$14.2 \text{ tons} = \underline{\hspace{2cm}} \text{ lbs}$

$14.7 \text{ oz} = \underline{\hspace{2cm}} \text{ lbs}$

$13.3 \text{ oz} = \underline{\hspace{2cm}} \text{ tons}$

$2.8 \text{ oz} = \underline{\hspace{2cm}} \text{ tons}$

$14 \text{ oz} = \underline{\hspace{2cm}} \text{ t}$

$.14 \text{ lbs} = \underline{\hspace{2cm}} \text{ oz}$

$10 \text{ tons} = \underline{\hspace{2cm}} \text{ lbs}$
