

The *Standard Unit* of measuring is mostly used in the United States. Most other parts of the world use the Metric System.

$$16 \text{ oz} = 1 \text{ lbs (pound)} \quad 2000 \text{ lbs} = 1 \text{ t (ton)}$$

$$\text{oz} = \text{ounce} \quad \text{lbs} = \text{pound} \quad \text{t} = \text{ton}$$

$$\underline{\quad} \text{ lbs} = \underline{\quad\quad\quad} \text{ oz}$$

$$\underline{\quad} \text{ oz} = \underline{\quad\quad\quad} \text{ lbs}$$

$$\underline{\quad} \text{ tons} = \underline{\quad\quad\quad} \text{ lbs}$$

$$750 \underline{\quad} = \underline{\quad\quad\quad} \text{ t}$$

$$\underline{\quad} \text{ tons} = \underline{\quad\quad\quad} \text{ lbs}$$

$$8 \underline{\quad} = \underline{\quad\quad\quad} \text{ lbs}$$

$$1000 \underline{\quad} = \underline{\quad\quad\quad} \text{ lbs}$$

$$\underline{\quad\quad\quad} \text{ oz} = \underline{\quad\quad\quad} \text{ lbs}$$

$$\underline{\quad\quad\quad} \text{ lbs} = \underline{\quad\quad\quad} \text{ tons}$$

$$\underline{\quad} \text{.5 tons} = \underline{\quad\quad\quad} \text{ lbs}$$

$$650 \underline{\quad} = \underline{\quad\quad\quad} \text{ oz}$$

$$14.2 \underline{\quad} = \underline{\quad\quad\quad} \text{ lbs}$$

$$14.\underline{\quad} \text{ oz} = \underline{\quad\quad\quad} \text{ lbs}$$

$$\underline{\quad} \text{.3 oz} = \underline{\quad\quad\quad} \text{ tons}$$

$$2.8 \underline{\quad} = \underline{\quad\quad\quad} \text{ tons}$$

$$\underline{\quad} \text{ oz} = \underline{\quad\quad\quad} \text{ t}$$

$$\underline{\quad} \text{.14} \underline{\quad} = \underline{\quad\quad\quad} \text{ oz}$$

$$\underline{\quad} \text{ tons} = \underline{\quad\quad\quad} \text{ lbs}$$
