

Standard Units: Length

The *Standard Unit* of measuring is mostly used in the United States. Most other parts of the world use the Metric System.

$$12 \text{ in} = 1 \text{ ft (foot)} \quad 3 \text{ ft} = 1 \text{ yd (yard)}$$

$$1760 \text{ yd} = 1 \text{ mi (mile)} \quad 5280 \text{ ft} = 1 \text{ mi}$$

$$\text{in} = \text{inch} \quad \text{ft} = \text{foot/feet} \quad \text{mi} = \text{mile}$$

$$\underline{\quad} \text{ yds} = \underline{\quad\quad} \text{ ft}$$

$$\underline{\quad} \text{ ft} = \underline{\quad\quad} \text{ yds}$$

$$\underline{\quad} \text{ ft} = \underline{\quad\quad} \text{ in}$$

$$\underline{\quad} \text{ in} = \underline{\quad\quad} \text{ ft}$$

$$\underline{\quad} \text{ ft} = \underline{\quad\quad} \text{ in}$$

$$2 \underline{\quad} = \underline{\quad\quad} \text{ in}$$

$$2 \underline{\quad} = \underline{\quad\quad} \text{ ft}$$

$$3 \underline{\quad} = \underline{\quad\quad} \text{ ft}$$

$$\underline{\quad}.333 \text{ yds} = \underline{\quad\quad} \text{ ft}$$

$$\underline{\quad} \text{ in} = \underline{\quad\quad} \text{ ft}$$

$$\underline{\quad} \text{ ft} = \underline{\quad\quad} \text{ yds}$$

$$75 \underline{\quad} = \underline{\quad\quad} \text{ ft}$$

$$\underline{\quad}.5 \text{ mi} = \underline{\quad\quad} \text{ yds}$$

$$12.5 \underline{\quad} = \underline{\quad\quad} \text{ ft}$$

$$\underline{\quad\quad} \text{ in} = \underline{\quad\quad} \text{ yds}$$

$$\underline{\quad\quad} \text{ ft} = \underline{\quad\quad} \text{ mi}$$

$$\underline{\quad} \text{ in} = \underline{\quad\quad} \text{ yds}$$

$$10 \underline{\quad} = \underline{\quad\quad} \text{ yds}$$
