

Tommy's First Job

Give - Save - Spend

Tommy was so excited that he ran all the way home after school. "Mom" he yelled, "I got my first job." "Well, congratulations, Son. What is the job?" asked his mom. "It is mowing Mr. Bill's lawn for the summer. He is going to pay me \$5 every week," he said.

"Remember what Dad told you about your business plan. Give one third of your earnings to charity, save one third, and the final third is your spending money and is up to you", said his mother. "Mom, I already have it all figured out," Tommy said. So now Tommy had a job to pay for his fancy bike.

Tommy divides his money equally in three different areas. How much will he Give, Save, and Spend?

$$\$5.00 \times .33 \text{ (33\%)} = \underline{\hspace{2cm}} \text{ or divide by 3}$$

$$3 \overline{) 5.00}$$

$$\$10.00 \times .33 \text{ (33\%)} = \underline{\hspace{2cm}} \text{ or divide by 3}$$

$$3 \overline{) 10.00}$$

$$\$15.00 \times .33 \text{ (33\%)} = \underline{\hspace{2cm}} \text{ or divide by 3}$$

$$3 \overline{) 15.00}$$

$$\$20.00 \times .33 \text{ (33\%)} = \underline{\hspace{2cm}} \text{ or divide by 3}$$

$$3 \overline{) 20.00}$$

$$\$25.00 \times .33 \text{ (33\%)} = \underline{\hspace{2cm}} \text{ or divide by 3}$$

$$3 \overline{) 25.00}$$
